

# Evaluation of the automated HISTO SPOT HLA AB test in comparison to a Luminex SA Test

Institute for Transfusion Medicine, Hanover Medical School  
Ing. Murielle Verboom

Medizinische Hochschule  
Hannover

Aim of the current study was the evaluation of the automated HISTO SPOT HLA AB (BAG Health Care) test in comparison to a Luminex Single Antigen Test

## Mr. SPOT<sup>®</sup>

Automated PCR-SSO system for antigen typing and antibody detection

# Mr. SPOT® Processor

# Mr. SPOT<sup>®</sup> Processor

## HISTO SPOT® HLA-Antibody Test Principle

Sera dilution

Binding of the HLA-antibodies to the proteins on the bottom of the microtiterplate

Colorimetric detection of the positiv reactions

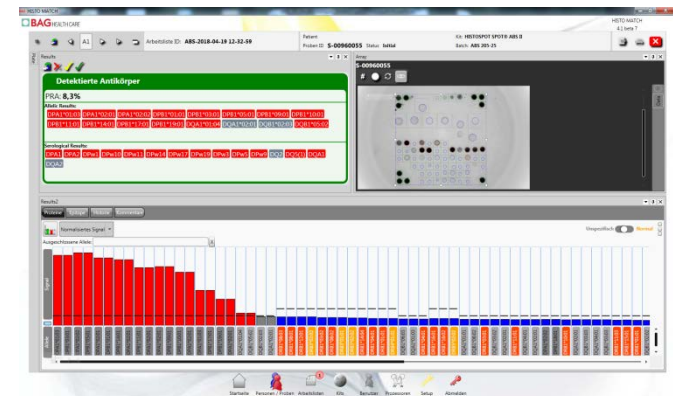

The presence and specificity of HLA-antibodies is determined in the reaction pattern

# Workflow

HLA AB ID Class I  
5 µl Serum + 95 µl SampleBuffer

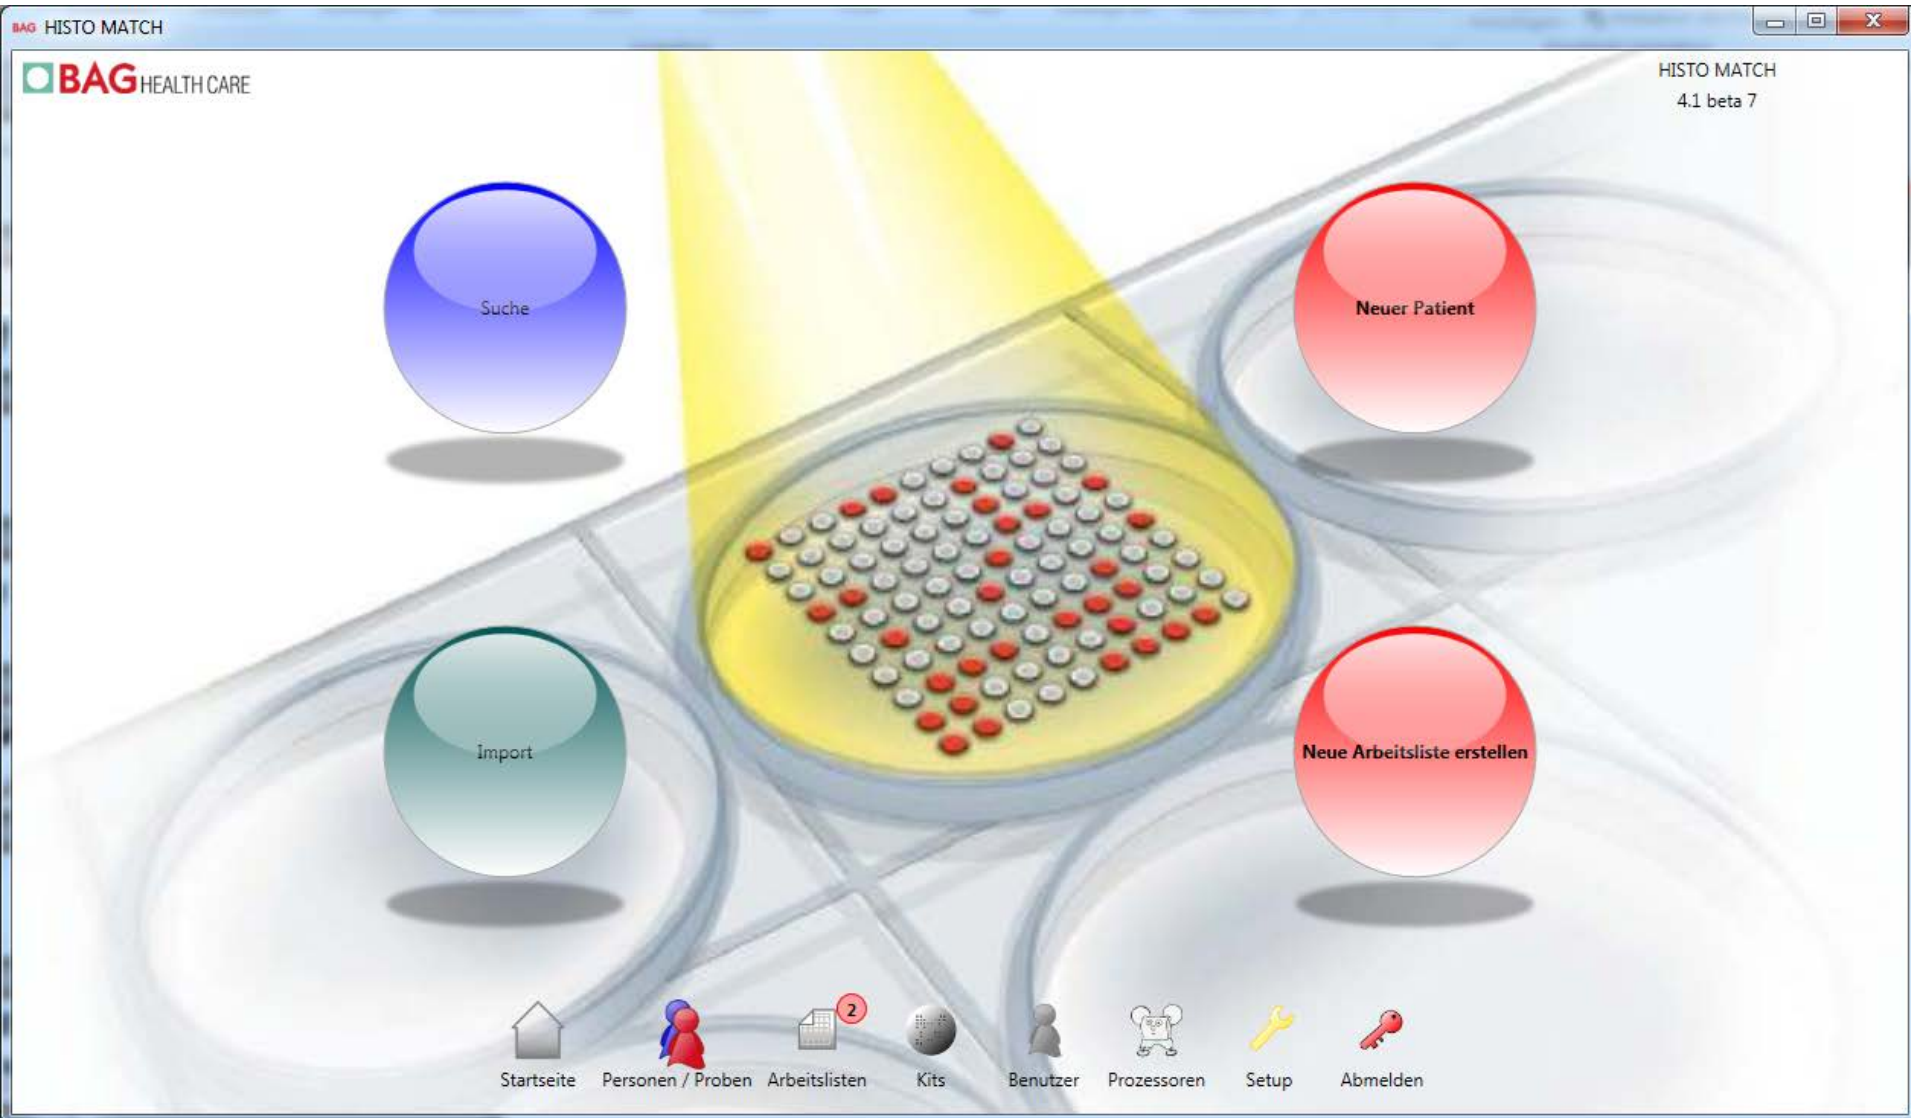

HLA AB ID Class II  
2 µl Serum + 98 µl SampleBuffer

Ausgeschlossene Allele

# Sera Treatment Heat Inactivation

**Untreated**

**Heat inactivated**

Heat inactivation of the sera increases unspecific background reactions with the HISTO SPOT HLA AB test and makes interpretation difficult or sometimes impossible.

# Sera Treatment with SeraPure

**Untreated**

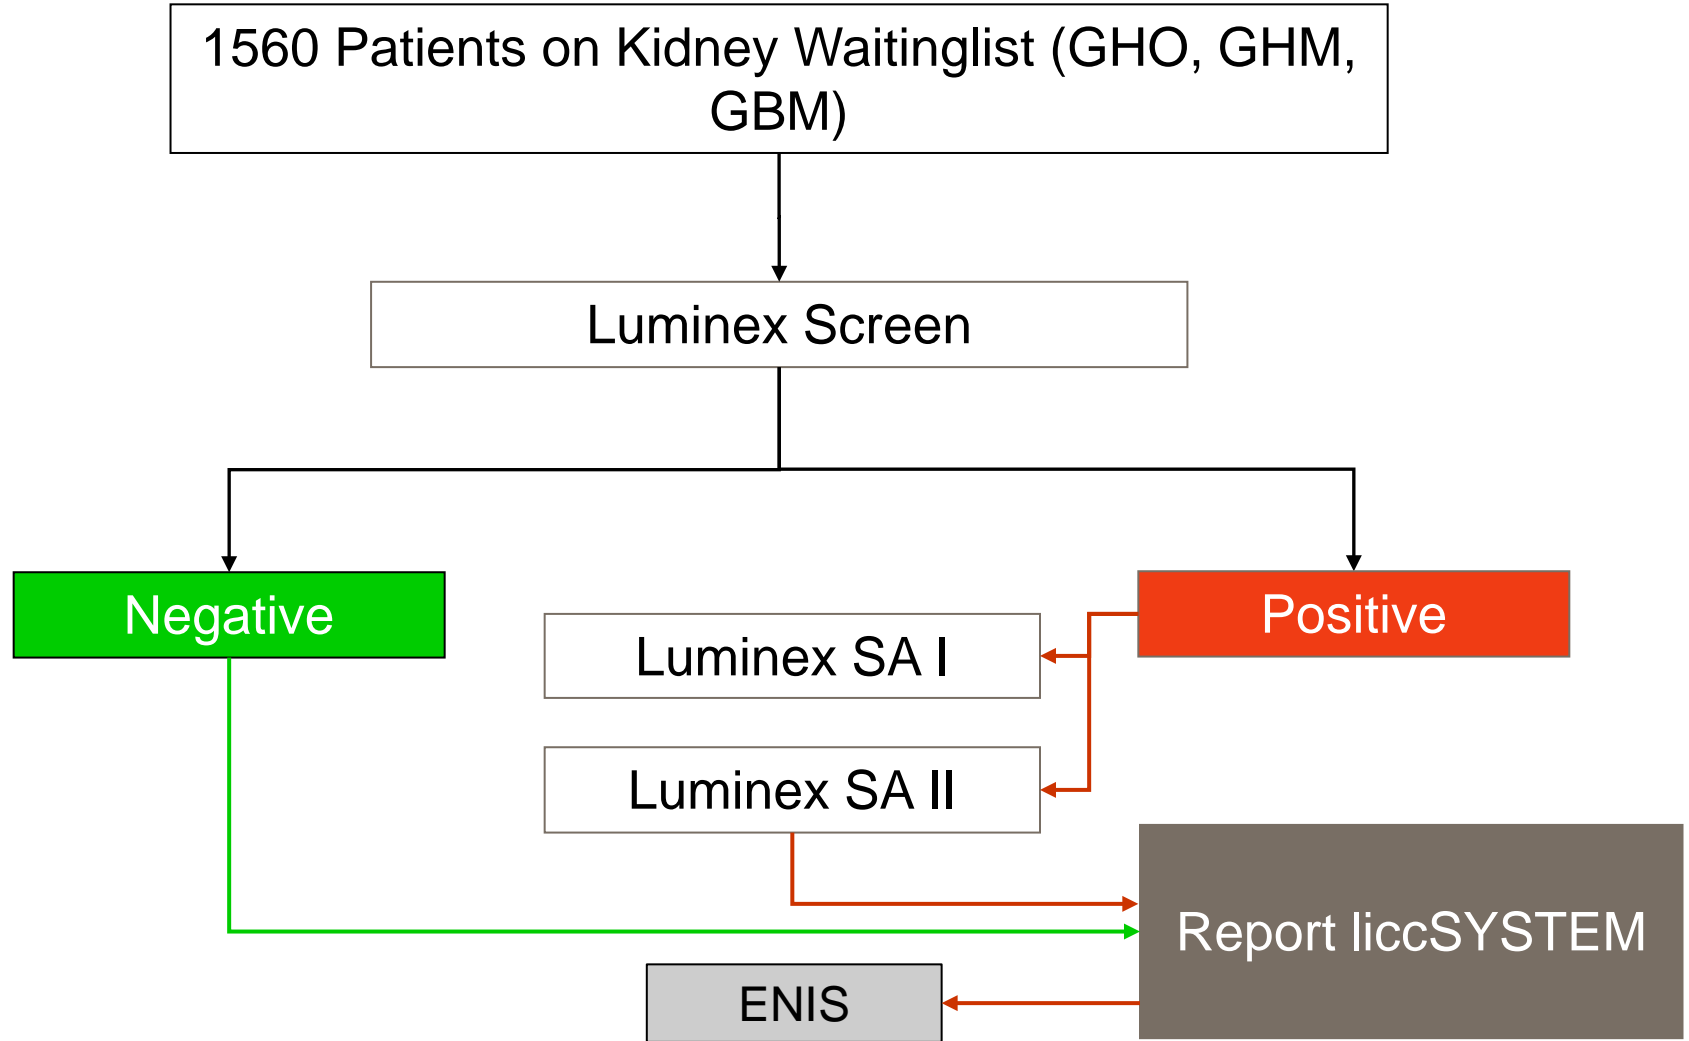

**SeraPure Treatment**

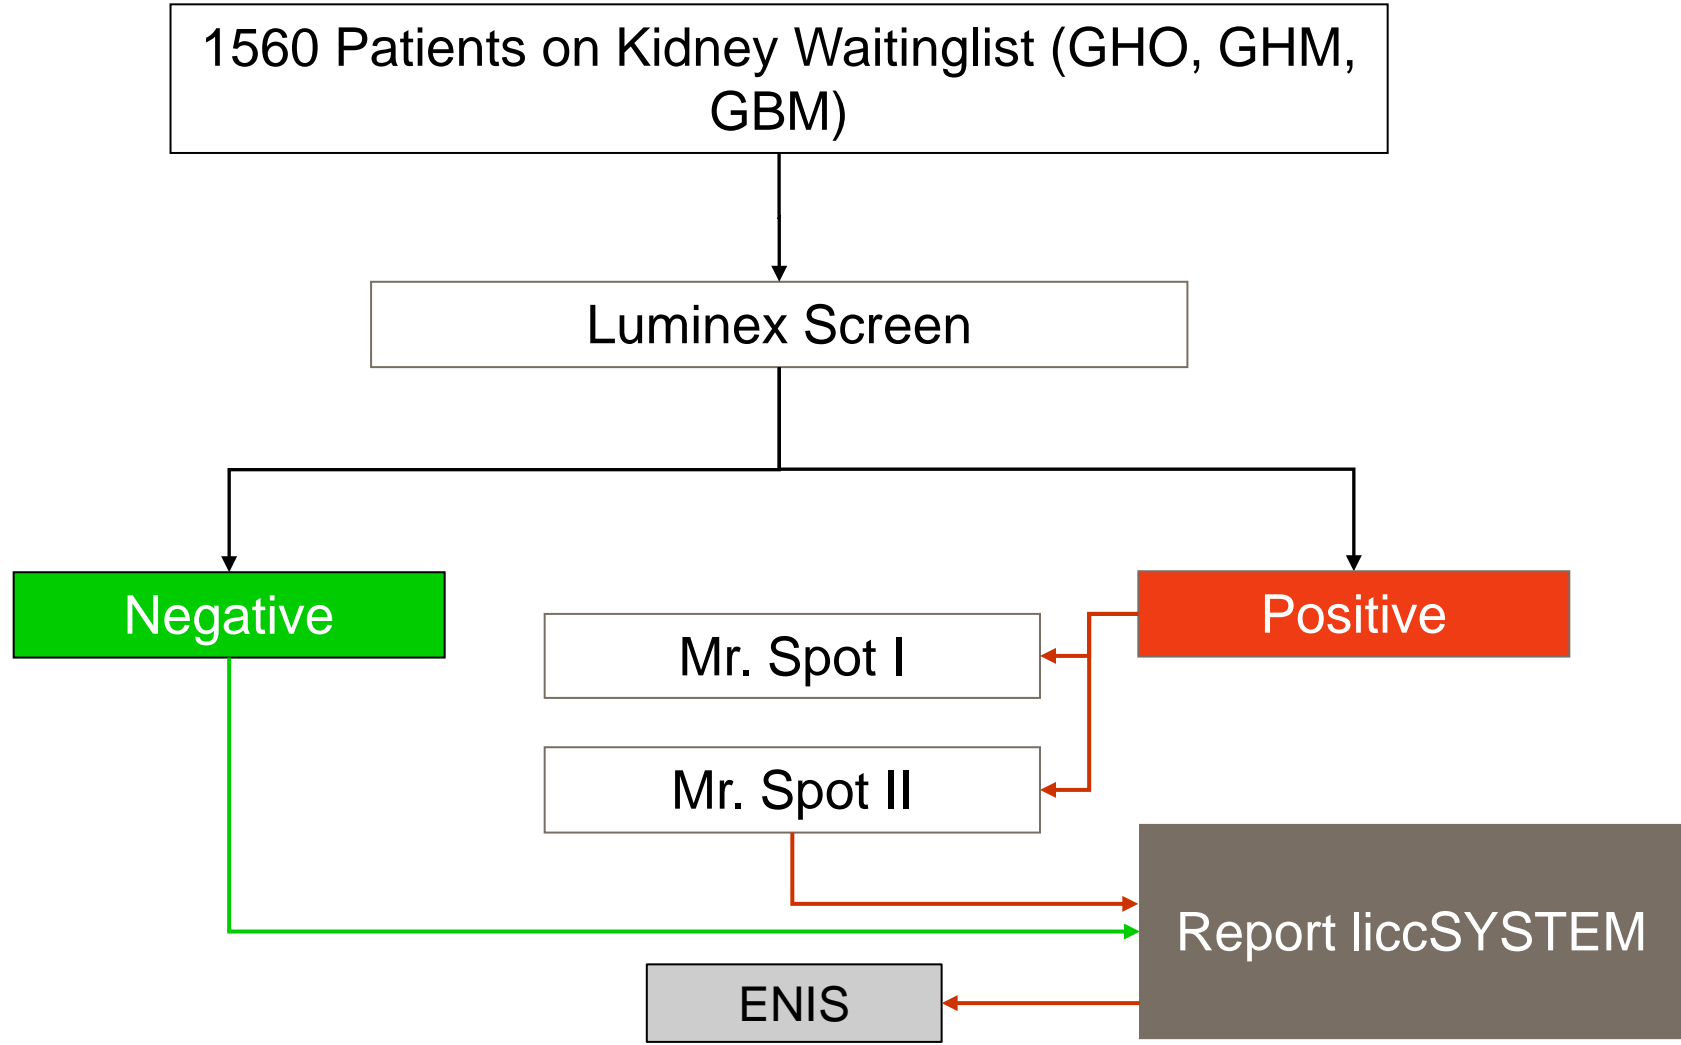

Sera treatment with SeraPure reduces unspecific background reactions with the HISTO SPOT HLA AB test and makes interpretation easier.

- Easy system to handle
- Easy automation and integration
- User friendly software
- High throughput
- Overall a good accordance of the results
- DQA1\*03, \*05, \*06 are missing on the spot
- DPA1\*02:01/DPB1\*19:01 unspecific positiv
